

A-Scan Ophthalmic Ultrasound

Most Accurate A-Scan Biometry. Configured to your clinical needs.

Unrivaled A-Scan Biometry

For biometry, this is the unit every clinician should have. Optos' portable OTI-Scan 3000 is a modular high-resolution ultrasound system that can be configured to meet the needs of your practice. It is available as an A-Scan system, a B-Scan system, a UBM system, or a combination B-Scan/A-Scan/UBM system. Scans are easy to capture and you can display multiple scans on a single screen.

Loaded With Features

- Easy, automated A-Scan image capture
- Proven technology
- Proprietary breakthrough algorithms
- Accurate and reliable axial length measurement
- "Dense Cataract" mode, "High Myopia" mode, and "Silicone Oil" mode are designed for difficult scanning conditions
- Multiple A-Scans displayed on a single Screen with variable zoom
- Unlimited "surgeon profile" for multiple users
- Smart IOL report print out
- Easy "plug & play" with any laptop or PC
- Portable and lightweight
- Upgradeable to B-Scan/A-Scan/UBM combo
